CALM FOCUS GROW

Creating Safe, Supportive SensPods for Every Student

WELCOME

At Forever Me SensPod, we believe every student deserves a place to feel calm, focused, and supported. Our sensory pods are thoughtfully designed to meet the diverse needs of today's learning environments empowering students to thrive, recharge, and succeed.

"Thank you for your interest in our SensPods. Helping every child feel seen, supported, and capable is a personal mission. Being neurodivergent myself, I understand this deeply, having experienced firsthand how difficult it can be to fit into a system that wasn't built for everyone. Every child has the potential to shine, if we just give them the right space. Kids aren't broken; the system is, and we can fix it together. If this mission resonates with you, please help us share it so that more children can have access to the SensPod. It's our kids, it's our future, every connection you have can help us reach another child."

Rachel Sekler, Founder & CEO

WHAT IS A SENSORY POD ?

A SenPod is a neutral, private, multi-sensory space that lets people reduce stimulation, reset and connect with themselves. Inside, you can control sound, light, and airflow, optionally add a scent and sensory toys.

This gives children, teens and adults a grounded place to self-regulate, be ready for learning, work or just have a break. As a result, they feel calmer and more focused. Because it's furniture, it installs quickly, plugs into standard power, and can be moved as your layout or needs change. Because it's inclusive by design, SensPods gradually systemically transform the culture, normalizing diverse socio-emotional needs and encouraging kindness and well-being.

ADDRESSING SYSTEMIC CHALLENGES FROM THE ROOT

Declining Child &
Staff wellbeing

Increased toxic
stress & undesired
behaviors

Limited physical
space within the
facility

Shortage of resources

Rise in neurodiversity &
special Education needs

OUR SOLUTION:

ForeverMe SensPods provide a peaceful bubble to recharge,
self - regulate, and return to their day ready to succeed

KEY BENEFITS

Reduces stress and anxiety

Creates immediate sense of calm

Supports self-regulation

Hospital And Pediatric Units

Libraries And Community Centers

**One SensPod, every need:
ForeverMe SensPod multi-sensory, plug-and-play,
relocatable, with Emergency Assist putting wellbeing first
and delivering a lower total cost than construction.**

PUBLIC & PRIVATE SCHOOLS

WHY IT MATTERS

Schools serve a diverse student population, many of whom face sensory and emotional challenges that can disrupt focus, learning, and wellbeing. Traditional classrooms and school spaces often lack dedicated areas for students to self-regulate, increasing stress for both learners and staff. Providing a calming, sensory-friendly environment helps students manage overwhelm, supports inclusion, and empowers teachers to foster a more balanced and effective learning community.

WHAT WE OFFER

ForeverMe SensPod is a personal learning space where all students, including neurodiverse learners can practice focus, creativity, and calm. It adapts to individual sensory needs, providing a supportive environment for self-regulation and emotional balance. At the same time, it gives staff a practical tool to support diverse learners, manage classroom wellbeing, and handle workload more efficiently.

HOW IT WORKS

Teachers and support staff can create and save individual student profiles, customizing each SensPod session through the touch pad, adjusting lighting, airflow, sound, and music to suit sensory needs. SensPods can be placed anywhere in the school, automatically adapting their functionality to blend naturally and transform any space into a calming, personalized environment that helps students regulate, focus, and engage throughout the day.

PUBLIC & PRIVATE SCHOOLS

IMPACT

Students experience fewer meltdowns, smoother transitions, and improved focus and participation. Neurodiverse and all learners feel safer, more understood, and better supported. The overall school environment becomes calmer, more inclusive, and conducive to learning.

BENEFITS

- Supports diverse learning needs and IEP goals while fostering a positive learning environment for all students.
- Reduces student behavioral crises and promotes self-regulation awareness across the school community.
- Eases staff burnout across classrooms and common areas.
- Encourages student independence, sensory awareness, and emotional regulation to boost academic engagement.
- Portable and relocatable to adapt to different classrooms, libraries, or wellness centers.
- Classified as furniture for 5-year depreciation.
- Enhances the school's reputation as a leader in wellness, innovation, and inclusive education.
- Promotes a calmer, more connected school culture benefiting students, staff, and families.

SPECIAL EDUCATION PROGRAMS

WHY IT MATTERS

Neurodiverse learners face higher sensory and emotional demands than most classrooms can support. Loud, unpredictable environments make it harder to stay focused and calm, leading to lost learning time and avoidable behavioural escalations. A dedicated calming space isn't a bonus, it's an essential tool that protects wellbeing and makes meaningful learning possible.

WHAT WE OFFER

SensPods provide a predictable, sensory-friendly environment where neurodiverse learners can reset, regulate, and return to class ready to learn. Each pod offers a private, calming space that supports de-escalation, reduces overwhelm, and gives educators a reliable tool while giving students a concrete place to practice self-regulation throughout the day.

HOW IT WORKS

SensPods provide a predictable, sensory-friendly environment where neurodiverse learners can reset, regulate, and return to class ready to learn. Each pod offers a private, calming space that supports de-escalation, reduces overwhelm, and gives educators a reliable tool while giving students a concrete place to practice self-regulation throughout the day.

IMPACT

Students experience fewer meltdowns, smoother transitions, and improved focus and participation. Neurodiverse and all learners feel safer, more understood, and better supported. The overall school environment becomes calmer, more inclusive, and conducive to learning.

SPECIAL EDUCATION PROGRAMS

- Supports diverse learning needs and IEP goals while fostering a positive learning environment for all students.
- Reduces student behavioral crises and promotes self-regulation awareness across the school community.
- Eases staff burnout across classrooms and common areas.
- Encourages student independence, sensory awareness, and emotional regulation to boost academic engagement.
- Portable and relocatable to adapt to different classrooms, libraries, or wellness centers.
- Classified as furniture for 5-year depreciation.
- Enhances the school's reputation as a leader in wellness, innovation, and inclusive education.
- Promotes a calmer, more connected school culture benefiting students, staff, and families.

PRIVATE CLINICS & THERAPY CENTERS

WHY IT MATTERS

Private clinics and therapy centers serve clients with diverse sensory, emotional, and developmental needs. These settings require personalized, adaptable environments that support effective therapy, reduce client overwhelm, and foster progress. Often, clinics lack dedicated spaces that fully address sensory regulation, which can limit therapy outcomes and client comfort.

WHAT WE OFFER

ForeverMe SensPod is a versatile, multisensory therapeutic space ideal for occupational, behavioral, or speech therapy. It provides a sensory-friendly environment where clients can practice self-regulation, calm, and focus. The pod adapts to individual sensory profiles, giving therapists a practical tool to enhance sessions and support client wellbeing. It's also perfect for waiting areas or as a calming space in between appointments.

HOW IT WORKS

Therapists can customize each session through the touch pad, adjusting lighting, airflow, sound, scent, and visual cues to align with each client's sensory needs. The SensPod offers a private, calming space that helps regulate the nervous system, improves readiness, complements therapy goals, and encourages self-regulation skills.

IMPACT

Children arrive calmer, respond more quickly, and build stronger emotional connections during therapy sessions, leading to more effective outcomes.

PRIVATE CLINICS & THERAPY CENTERS

BENEFITS

- Enhances professional image and creates a welcoming clinic atmosphere.
- Saves time by helping children transition smoothly into sessions.
- Portable, modular, and adaptable to any therapy space.
- May be billed under environmental or sensory therapy.
- Depreciable over 5 years; built in Canada and delivered ready to use.

HOSPITALS AND PEDIATRIC UNITS

WHY IT MATTERS

Hospital environments can be overwhelming for children, with bright lights, loud noises, and unfamiliar routines that increase stress, trigger sensory overload, and complicate treatment. These sensory challenges may undermine recovery, disrupt care, and make visits traumatic for both patients and their families. Dedicated sensory-friendly spaces are often lacking, limiting opportunities for children to regulate emotions and feel safe.

WHAT WE OFFER

ForeverMe SensPod provides a calming, multisensory space within hospitals and pediatric units where children can self-regulate, reduce anxiety, and find comfort amidst clinical surroundings. The SensPod adapts to individual sensory needs, supporting emotional balance and easing the hospital experience. It also offers children a safe place to prepare for medical procedures or recover afterward.

HOW IT WORKS

SensPods can be placed throughout hospitals and pediatric units for multiple purposes. Patients can use them independently in waiting areas or between procedures as a calming, sensory-friendly space. Additionally, healthcare staff can incorporate SensPods into therapy or treatment sessions, customizing lighting, airflow, sound, scent, and visual cues via the touch pad to meet each child's sensory needs. This flexibility makes SensPods a versatile tool for supporting emotional regulation, reducing anxiety, and improving cooperation across diverse clinical and non-clinical settings.

HOSPITALS AND PEDIATRIC UNITS

IMPACT

Children experience reduced anxiety, improved emotional regulation, and increased cooperation during medical procedures. Families feel more supported, while staff benefit from smoother care delivery in a calmer environment.

BENEFITS

- Enhances patient comfort and emotional wellbeing.
- Supports faster recovery and better treatment compliance.
- Assists nurses, child life specialists, and healthcare teams during treatments.
- Reduces procedure delays and cancellations caused by distressed or overwhelmed children.
- Increases patient satisfaction and provides comfort to families.
- Demonstrates the hospital's commitment to child-centered, innovative care.

LIBRARIES AND COMMUNITY CENTERS

WHY IT MATTERS

Modern libraries and community centers aim to serve all visitors, including those with sensory sensitivities, attention challenges, or social anxiety.

WHAT WE OFFER

ForeverMe SensPods transform corners into inclusive mindfulness zones, offering a quiet space for reflection, calm, or sensory decompression.

HOW IT WORKS

Visitors can use the SensPod's touch pad to select music, lighting, or mindfulness exercises suitable for all ages.

BENEFITS

- Encourages accessibility and inclusion in community spaces.
- Reduces environmental noise and stress.
- Attracts grants and wellness-focused funding.
- Can host mindfulness or emotional literacy programs.
- Energy efficient, mobile, and low-maintenance.
- Fully depreciable and Canadian-made.

WHAT'S INCLUDED AND HOW IT WORKS

1. WHAT'S INCLUDED:

- The SensPod itself with a fixed table.
- Touchpad that controls the environment customization.
- Aromatherapy beads patches box - 3 signature scents (100 oil beads of each, includes 300 units).
- A box of sensory toys for tactile play and emotional reset.

2. HOW IT WORKS:

A. CHOOSE SIZE

Pick the SensPod size that fits your space and your needs - from a single-child SensPod to a group SensPod. All models are built for easy installation, mobility, and comfort. No construction. No permits. Just plug, play, and relax.

B. PICK THEME

Choose the theme that fits your environment best. All themes were chosen to nurture focus, calm, and emotional balance.

C. ADD ACCESSORIES / REFILL (optional)

- Make your SensPod even cozier with a soft chair or sofa, optional upgrades for extra comfort.
- Scent bead pack (100 units).
- Additional toy box / kits

SENSORY TOYS

WELCOME TO YOUR SENSORY TOOLKIT!

Unlock a world of calm, focus, and creativity with our curated Sensory Toy Kits. Each bag is filled with tactile treasures designed to help children self-regulate, improve fine motor skills, and find moments of joy throughout their day.

WHAT'S INSIDE?

Each toolkit includes a dedicated storage box to keep everything organized, with optional refill packs available to refresh and adapt the kit as needed.

BENEFITS

- Supports focus and emotional regulation
- Reduces anxiety and restlessness
- Encourages creativity and play
- Strengthens fine motor

AROMATHERAPY BURST BEAD PATCHES

Our Aromatherapy Burst Bead Patches are a simple, safe way to support children's moods and emotional needs throughout the day. Each patch contains pure essential oils in easy-to-use, mess-free beads-just squeeze to release the aroma and enjoy the benefits.

Each scent includes an initial pack of 100 patches.
To maintain ongoing emotional support throughout the year,
refill packs are available for purchase.

FOREVER ME SENS POD TOUCHPAD

SensPod comes with an intuitive touchpad where children and adults can adjust experience settings to support their sensory needs.

Touchpad functionality is supported through an ongoing service subscription.

Adjustable Lights & Fan

Easily customize light color, brightness, and fan speed for a comfortable, sensory-friendly space.

Preset & My Zone

Choose between Calming, Focus, Quiet Time presets or create your own saved profile to quickly match to your mode and goal.

Timer

Support mindfulness and structured use with two modes: Free Timer for any duration, and Focus Session - a guided focus block followed by a short reset break to build sustained attention and healthy routines.

Feelings Are Messages

Supports emotional awareness by teaching students to pause, notice body signals, and understand what their feelings are communicating. Students can then choose tools that help them feel calmer, safer, and more focused.

Daily Inspiration

Enjoy 365 motivational quotes and positive prompts to encourage reflection and a love of reading.

Sounds, Music & Meditations

Select calming and ambient sounds or kid-friendly guided meditations to reduce stress and boost focus.

Languages

The touchpad supports multiple languages for an inclusive and accessible experience, ensuring everybody can interact with SensPod in their preferred language.

PEACE OF MIND PLAN

Continuous Support & Updates for Your SensPod

Your SensPod Includes the TouchPad (and It's What Makes Everything Feel Easy)

The ForeverMe SensPod is more than a physical space - it's a supported wellbeing experience. Every SensPod includes our TouchPad, the heart of the system, built to help children and users self-regulate with confidence and consistency.

The TouchPad brings the SensPod to life with:

- Guided sensory choices (visuals, sound, calming content, and more)
- Simple, intuitive controls for staff and users
- Personalized routines and structured experiences
- Connected tools that help teams understand what's working over time

Because the TouchPad is a cloud-supported connected system, it requires ongoing care to remain secure, reliable, and continuously improving.

Service Plan (Required for Full Functionality)

To keep your SensPod running smoothly in real school/organization life, the TouchPad operates with a mandatory monthly Service Plan. This supports continuous updates, maintenance, and support-so the system stays protected, up to date, and ready when wellbeing can't wait.

PEACE OF MIND PLAN

Continuous Support & Updates for Your SensPod

What the Service Plan Includes (and Why It Matters)

The SensPod Service Plan ensures a worry-free, fully supported TouchPad experience for your team and users.

- **24/7 Support:** Real help when questions come up-Wi-Fi changes, settings, troubleshooting, and remote assistance.
- **Ongoing Updates (OTA):** Automatic software improvements, new content, and system enhancements - no new hardware needed.
- **Security & Stability:** Essential maintenance and updates to keep the system protected and reliable.
- **Usage Insights & Reports:** Understand usage over time (frequency, peak times, adoption opportunities, underuse indicators).

A Simple Promise

At the end of a long day, wellbeing spaces need to feel calm- not complicated.

The SensPod Service Plan is how we keep that promise: Your SensPod stays supported, updated, secure, and improving - so your team can stay focused on what matters most: the people inside.

MY ZONE

My Zone lets each user create a personal comfort profile inside the ForeverMe SensPod-so every session feels familiar, safe, and easy to repeat.

With staff-approved settings, users can save:

- Name / Profile
- Lighting preferences
- Preferred music or guided meditation or moving visuals
- Fan/airflow level

By returning to the same settings each time, My Zone supports quicker transitions into calm and focus promoting everyday wellbeing through simple, repeatable self-regulation. It helps users reset, feel better, and return to learning or work with more ease. It's a practical way to make the SensPod feel like your own familiar space, whenever you need it.

FEELINGS ARE MESSAGES

Feelings Are Messages is a guided experience designed to help students understand that feelings are not problems to fix, but meaningful signals from the body.

The process encourages students to pause, notice physical sensations, and describe their experience in their own words, without judgment or pressure to label emotions correctly.

By connecting body signals, emotional intensity, and personal needs, students develop emotional awareness and emotional granularity.

The tool supports self-regulation by allowing students to choose supportive sensory or calming tools based on what their body needs in that moment.

All feelings are allowed, and students are empowered to make choices rather than suppress or avoid emotions.

This approach helps build long-term self-trust, regulation skills, and emotional resilience in a school-safe, non-clinical way.

TECHNICAL INFORMATION:

- 36 dB certified noise reduction
- One touch LCD control panel
- 100 air exchanges per hour
- Integrated Bluetooth speakers
- Motion sensor lights and fans
- Interior felt sound absorption panels
- Pre-engineered knockout hole

- Frosted Film Glass
- External Fire Extinguisher Unit

OUR VISION AND MISSION

The ForeverMe SensPod was created to bring more light, calm, and possibility into children's lives. It invites teachers, parents, and schools to see beyond limitations - to recognize the potential inside every child and nurture it with love and respect.

With its mobile, flexible, and innovative design, the Sens Pod adapts to any space and puts the child's well-being first. It's not just a pod - it's a movement toward compassion, awareness, and a future where every child is seen, heard, and empowered to shine. ForeverMe SensPod is more than a sensory pod – it's a safe, familiar place where children can reconnect with themselves, again and again. Every detail was designed to support emotional well-being, reduce stress, and give both students and staff a sense of security and comfort.

PERSONALIZED PROFILE PREFERENCE

Every child is different. That's why ForeverMe Sens Pod lets each child create their own calming vibe:

- They can choose their preferred lights, sounds, and scents
- Save their favorite combination under their name
- Next time they enter the SensPod, they simply tap their name and the pod returns to their familiar setting.

This repeatable, predictable experience helps children:

- Feel safe and in control
- Return to a known, comforting environment
- Reduce stress and anxiety by going back to "their place" inside the SensPod

MULTISENSORIAL APPROACH & THE POWER OF CHOICE

In a world that moves quickly and loudly, moments of calm and clarity have become a rare luxury. The Forever Me SensPod was created to offer those moments back. By weaving together gentle light, soothing sound, fresh airflow, subtle scent, and personalized environmental control, the SensPod creates a multisensory sanctuary one that feels perfectly attuned to whoever steps inside.

WHY MULTISENSORIAL ENVIRONMENTS MATTER

Our brains are wired for layered sensory experiences, combining light, sound, scent, and airflow. Research shows that coordinated multisensory stimulation reduces stress, improves focus, and supports emotional regulation. For example, a 2025 study found that combining touch and scent significantly lowered anxiety and improved heart-rate variability compared to single-sense conditions.

Calm & relaxation: Soft light, gentle sound, and subtle scent activate the parasympathetic nervous system.

Focus & recovery: Multisensory inputs improve attention and psychological restoration.

Emotional balance: Evidence shows reduced agitation and enhanced mood in adults using multisensory environments.

Adjusting light, sound, scent, and airflow gives users ownership and fosters belonging, dignity, and well-being. The Forever Me SensPod transforms these insights into a personal, restorative space where senses align and every moment feels just right.

MULTISENSORIAL APPROACH & THE POWER OF CHOICE

By allowing users to control their sensory environment, the Foreverme SensPod strengthens autonomy, confidence, and dignity, while honoring individual preferences to create a safe, inclusive space for all neurotypes and sensitivities. This flexibility reduces overwhelm, supports nervous-system regulation, and promotes calmer thinking and overall wellbeing.

CHOICES AVAILABLE

1. Lighting Options

Lighting strongly affects mood and focus. The SensPod offers:

- Adjustable colour ambient lighting - warm, cool, vibrant, or calming tones.
- Customizable face-light brightness for reading, relaxing, or grounding. Lighting becomes a self-regulation tool: brighter for focus, warm for calm, cool for reset.

2. Sound Options

Users can shape their auditory environment with:

- Music
- Nature sounds (rain, waves, forest)
- White noise / low-frequency tones
- Complete silence
Whether soothing or stimulating, sound is fully user-controlled.
- Moving visuals.

3. Feelings Are Messages

Feelings Are Messages helps students pause, tune in to what's happening inside, and turn everyday feelings into useful information. Through a quick guided check-in, students notice body cues, decide what they need, and choose a supportive tool - such as light, sound, music, or quiet mode - to reset, regulate, and return to learning with greater focus and calm.

MULTISENSORIAL APPROACH & THE POWER OF CHOICE

4. Scent: Bids Aromatherapy

The Scent is delivered through wearable aromatherapy patches with bursting beads.

- The scent is personal to the wearer
- It does not linger in the SensPod
- Others are not exposed to unwanted smells

Aromatherapy becomes optional, safe, and entirely customizable.

5. Touch: Toys

A curated tactile toy kit supports self-regulation through safe, hands-on sensory input. When hands are engaged, many users feel more grounded - making it easier to calm, focus, and transition back to learning or work.

6. Timer

The timer lets staff and users set a clear session length in advance-short regulation breaks or longer focus time. With a structured start and gentle end reminder, each session becomes predictable, reducing overwhelm and supporting wellbeing-so users can return to learning or work more smoothly, without power struggles.

BECAUSE EVERYONE REGULATES DIFFERENTLY

The most powerful support is not telling someone what to feel. It's giving them the tools to choose what they need.

ForeverMe SensPod offers a multi-sensory experience guided by personal choice, helping users shift from overwhelm to calm, from tension to focus, and from shutdown to readiness.
